## Details

This function is based on section 3.4 at the published pdf file (<http://statdb.nstac.go.jp/wp/wp-content/uploads/2013/06/API-spec.pdf>).

## Value

<code>value</code>	This is the data of the specified survey.
<code>note</code>	This is the note of the specified survey.

## Note

This product uses the Gateway to Advanced and User-friendly Statistics Service API but is not endorsed or certified by the Statistics Bureau or the National Statistics Center.

## Author(s)

Yuichiro Otani <>yuichiro@otani.co>>

## References

<http://statdb.nstac.go.jp/>  
<http://statdb.nstac.go.jp/wp/wp-content/uploads/2013/06/API-spec.pdf>

## See Also

[get.stat.list](#), [get.meta.info](#)

## Examples

```
# stat.list <- get.stat.list(app.id, list(surveyYears=2007, lang='J'))
# stat.data <- get.stat.data(app.id, list(limit=100),stat.list$id[1])
# show data of the survey
# stat.data$value
# summation of data
# sum(stat.data$value$value)
# mean of data
# mean(stat.data$value$value)
# standard deviation of data
# sd(stat.data$value$value)

# get histogram
# hist(stat.data$value$value, breaks=25)
```

get.stat.list

*Object to Get a List of Survey.*

## Description

This object works to get a list of surveys.

## Usage

```
get.stat.list(app.id, param)
```

## Arguments

app.id	Your application ID. Using all functions contained govStatJPN package, this ID is required. Registration page is <a href="https://statdb.nstac.go.jp/apiuser/php/index.php?action=provisional">https://statdb.nstac.go.jp/apiuser/php/index.php?action=provisional</a> Login page is <a href="https://statdb.nstac.go.jp/apiuser/php/index.php?action=login">https://statdb.nstac.go.jp/apiuser/php/index.php?action=login</a> After logging in, you are able to issue your application ID.
param	You can set the list of survey years and language as a list object like <code>list(surveyYears=2012, lang="J")</code> . If survey year is not defined, this year's survey list will return. When you need data set in English. Define <code>lang="E"</code> instead of <code>lang="J"</code> . Although setting other parameters is allowed in the API, the parameters that can be used in this function is limited into these two types. The number of parameters can be set in this function will be extended in the future.

## Details

This function is based on section 3.2 at the published pdf file (<http://statdb.nstac.go.jp/wp/wp-content/uploads/2013/06/API-spec.pdf>).

**Value**

- id** This is a stat id of the survey. This object will be used in other functions in this package. The meanings of other values are provided in the reference(Japanese).

**Note**

This product uses the Gateway to Advanced and User-friendly Statistics Service API but is not endorsed or certified by the Statistics Bureau or the National Statistics Center.
